

CADViewX in PacCAD®

1. General

PacCAD is a packaging design software commonly used by design departments in packaging manufacturing companies. With PacCAD, the user can easily create a parametric drawing from hundreds of packaging templates. The program creates the drawing on AutoCAD/BricsCAD by using the automation features and commands.

Paced also use databases to create and handle all project data.

2. CADViewX Usage

CADViewX gives customers the opportunity to take advantage of the PacCAD software without need to have AutoCAD installed on their computer. By using a PacCAD program and its database, the management, sales office, and other officials in the company can easily follow on the designing progress, print drawings and specifications with drawing documents and similar programs.

The CADViewX component in PacCAD is versatile and is also suitable for:

- Multi View Screen of project revisions
- Multi View Screen of projects searching results.

These two options give designers the benefit of visual searching results.
